

OUR VALUES

TRUST – OUR CORE VALUE

We are always obliging, fair and honest towards others. Customers, employees and business partners can depend on our services, statements and assurances.

CUSTOMER LOYALTY

We generate customer benefits and give our all to ensure that our customers always choose us. We listen to them and anticipate their needs. For instance, we offer customised solutions and innovations with real added value – our contribution to secure access to medication in society.

ENTREPRENEURSHIP

We are open to new things and look beyond our immediate environment. We encourage people to scrutinise what has been achieved, to lead the way and change things.

SUPERIOR PERFORMANCE

Together, we want to achieve our aim of being the best. This is why we demand and reward achievement. We further develop our products and solutions as well as ourselves. We thus offer our customers new opportunities – and tap into future success potential for ourselves.

SUSTAINABILITY

We assume responsibility for people and the environment. As a medium-sized family company, we make a valuable contribution to society. We act in a prudent and respectful manner because we also keep our eye on the long-term consequences. In doing so, we combine the economic expertise of our company with ecological, social and societal responsibility.
